

Sitracker Telecom for Contractors

Rising labor and IT costs, shrinking margins, scattered data, and supply chain disruptions.¹

These are just a few of the challenges facing contractors who deploy critical telecom networks today. But with record amounts of funding funneling into telecom infrastructure upgrades and deployments around the globe, there is significant opportunity for those who can figure out the key to doing more with less. Sitracker provides contractors with cloud-based Deployment Operations Management software to efficiently manage distributed projects, sites and assets at scale.

Sitetracker Helps Contractors Run Better Together

Sitetracker helps you bring your projects and people together on one platform to easily manage everything from field assignments and timesheets to job schedules and closeouts. Say goodbye to inefficient spreadsheets and paper processes and get ready to watch truck rolls go down, projects closeout faster, and your business grow.

Efficient Tools Improve Project Speed and Quality

Deliver more projects in less time by standardizing your project processes, operations and workflows in one place. A template engine makes projects repeatable, helping you get up and running quickly and smoothly, with the key milestones and critical activities that are unique to your business. Project managers and field crews can also easily manage and track construction, installation and even execute closeouts from both web and mobile ensuring every project wraps up safely, on-time and within budget.

Intelligent Insights Optimize Rollouts and Operations

Gain complete visibility into deployments and operations with easy-to-configure reports and dashboards, like Critical Activities Completed by Program and Average Time to Closeout, to help you make data-driven decisions, improve forecasting, and respond quickly to bottlenecks as they occur. Plus, with embedded AI, you can leverage advanced analytics to proactively understand risks and guide continuous improvements in project performance.

Easy-To-Use Experience Leads to Successful Deployments

Sitetracker Telecom fully templativizes mobile field work to make sure your project managers can deploy the right crews to the right sites—the first time. Live project Trackers and Sitetracker Timeline views make it easy to quickly assess project progress and milestones and manage dependencies. You can also communicate job information, view maps, or share schedules and documents with subcontractors through the Sitetracker Connect Portal to expedite project turnaround time and time to revenue.

Key Sitetracker Capabilities for Contractors

- ✓ **Improve communication and collaboration**
 - **Sitracker Mobile** connects your office to the field, empowering crews to document progress, complete site inspections, submit reports, and enter timesheets on-site or on their way to the next job
 - **Sitracker Connect** keeps you in sync with all your subcontractors for critical dates, documents and activities through a portal and integration to other Sitetracker environments
- ✓ **Develop insights and track dependencies**
 - **Reports & Dashboards** puts key project performance metrics at your fingertips to help you make better decisions in less time
 - **Sitracker Timeline** visualizes activity progress, making it easier to manage dependencies, proactively identify slowdowns, and control costs
 - **Sitracker AI** enhances forecasting with predictive analytics that help you prevent resource bottlenecks before they start
- ✓ **Keep projects on track**
 - **Project Templates** standardize your processes, increasing project manager capacity so you can grow your business with high-volume deployments
 - **Trackers** give you a clear view of project schedules and dependencies allowing your team to improve forecasts and optimize project capacity
- ✓ **Match the right resources with the right jobs every time**
 - **Job Planner** takes the guesswork out of dispatch and scheduling, helping you reduce truck rolls and project turnaround time
 - **Skills and Certification Management** matches capability with availability across all your field resources to ensure you always have the right people and equipment for the job
- ✓ **Get paid faster**
 - **Financial Management** aligns project budgets, milestones, and financials for faster time to revenue
 - **Closeout Packages** capture key field data, check requirements, and generate customized documents ensuring prompt payments and satisfied customers
- ✓ **Forms keep jobs on track and project data fresh providing field technicians with step-by-step checklists that include mobile photos, document submission and real-time feedback. Geofencing ensures data is submitted on site**

SITETRACKER

Our mission is to help deploy tomorrow's infrastructure faster, so that people everywhere can experience digital equity and a more sustainable future.
